

Day 1: Ushuaia

Check in at the Australis travel center at 409 San Martín Street in downtown Ushuaia between 10:00 and 16:00 (10 AM-4 PM) on the day of your cruise departure. Board the M/V *Stella Australis* at 17:30 (5:30 PM). After a welcoming cocktail reception hosted by the captain and his crew, the ship departs for one of the most remote corners of planet Earth. During the night we traverse the Beagle Channel and cross from Argentina into Chilean territorial waters. The lights of Ushuaia disappear as we turn into the narrow Murray Channel between Navarino and Hoste islands.

Day 2: Cape Horn – Wulaia Bay

By early morning, *Stella Australis* is cruising across Nassau Bay into the remote archipelago that includes Cape Horn National Park. Australis is the only expedition cruise ship company with permission from Chilean authorities to navigate the Murray Channel to Cape Horn, and because of its concession the only travel company allowed to land passengers at Wulaia Bay. Weather and sea conditions permitting, we shall go ashore on the windswept island that harbours legendary Cape Horn. Discovered in 1616 by a Dutch maritime expedition -- and named after the town of Hoorn in West Friesland -- Cape Horn is a sheer 425-meter (1,394-foot) high rocky promontory overlooking the turbulent waters of the Drake Passage. For many years it was the only navigation route between the Pacific and Atlantic, and was often referred to as the "End of the Earth." The park was declared a World Biosphere Reserve by UNESCO in 2005. The Chilean navy maintains a permanent lighthouse on the island, staffed by a light-keeper and his family, as well as the tiny *Stella Maris* Chapel and modern Cape Horn Monument. Sailing back across Nassau Bay, we anchor at fabled Wulaia Bay, one of the few places in the archipelago where the human history is just as compelling as the natural environment. Originally the site of one of the region's largest Yámana aboriginal settlements, the bay was described by Charles Darwin and sketched by Captain Fitzroy in the 1830s during their voyages on HMS *Beagle*. This area is also renowned for the mesmerizing beauty and dramatic geography. After a visit to the Australis-sponsored small museum in the old radio station -- which is especially strong on the Yámana people and European missionaries in the area -- passengers have a choice of three hikes (of increasing degrees of difficulty) that ascend the heavily wooded mountain behind the bay. On all of these you will be strolling through an enchanted Magellan forest of lengas, coigües, canelos, ferns, and other endemic fauna to reach a panoramic viewpoint overlooking the bay.

Day 3: Agostini Sound and Aguila Glacier

After nightfall we re-enter the Beagle Channel and sail westward along the southern edge of Tierra del Fuego into watery wonderland protected within the confines of Alberto de Agostini National Park. During the night, the *Stella Australis* is for a brief time exposed to the open Pacific. We then navigate a zigzag route through the Cockburn Channel, Magdalena Channel and Keats Fjord to reach scenic De Agostini Sound. Named after an Italian Salesian priest who worked among the region's indigenous people during the first half of the 20th century, De Agostini Sound is flanked by numerous glaciers and sheer saw-toothed peaks reminiscent of Torres del Paine. Our shore excursion this morning is Águila ("Eagle") Glacier, which hovers above a placid glacial lagoon surrounded by primeval forest. After a Zodiac landing on the beach, passengers hike around the edge of the lagoon to a spot near the base of the frozen facade. Condors can sometimes be seen soaring high above, but there is always abundant bird life around the lagoon. This landing provides the perfect opportunity to experience the beauty of Patagonia's sub-Antarctic rainforest and to see how the power of nature has moulded the spectacular landscape.

Day 4: Magdalena Island – Punta Arenas

After an overnight cruise through Magdalena Channel and back into the Strait of Magellan, we anchor off Magdalena Island, which lies about halfway between Tierra del Fuego and the Chilean mainland. Crowned by a distinctive lighthouse, the island used to be an essential source of supplies for navigators and explorers and is inhabited by an immense colony of Magellanic penguins. At the break of dawn, weather permitting, we go ashore and hike a path that leads through thousands of penguins to a small museum lodged inside the vintage 1902 lighthouse. Many other bird species are also found on the island. In September and April -- when the penguins dwell elsewhere -- this excursion is replaced by a ride aboard Zodiacs to Marta Island to observe South American sea lions. After a short cruise south along the strait, disembarkation at Punta Arenas is scheduled for around 11:30 AM. You are free to explore Punta Arenas, founded in 1848 by Chilean settlers and now the capital of Chile's Magallanes & Antarctica region. There's plenty to keep you busy in the city: the Magellan Monument in the Plaza de Armas, the Magallanes Regional Museum (Casa Braun-Menéndez), the Shackleton Bar in the Hotel Jose Nogueira, the excellent Salesian Museum, the flamboyant Municipal Cemetery, and the Nao Victoria maritime museum with its full-sized reproductions of Magellan's flagship, HMS *Beagle*, Shackleton's rescue craft, and the *Goleta Ancud* pioneer ship. Re-board *Stella Australis* at 18:00 (6

PM). After a welcoming cocktail reception hosted by the captain and his crew, the ship departs on the second half of the journey. During the night, the lights of Punta Arenas fade into the distance as we cross the Strait of Magellan and enter the Whiteside Canal between Darwin Island and Isla Grande de Tierra del Fuego. * Camera extension poles are prohibited on Magdalena Island*

Day 5: Ainsworth Bay – Tuckers Islets

By dawn *Stella Australis* is sailing up Admiralty Sound (Seno Almirantazgo), a spectacular offshoot of the Strait of Magellan that stretches nearly halfway across Tierra del Fuego. The snow-capped peaks of Karukinka Natural Park stretch along the north side of the sound, while the south shore is defined by the deep fjords and broad bays of Alberto de Agostini National Park. We go ashore at Ainsworth Bay, which harbours copious bird life and a colony of southern elephant seals which can sometimes be spotted. Two guided excursions are available: one is along the edge of a stream, peat bog and beaver habitat to a waterfall-and-moss-covered rock face tucked deep inside a pristine sub-polar forest; the other is a more strenuous hike along the crest of a glacial moraine. Both afford views of Marinelli Glacier and the Darwin Mountains. Leaving Ainsworth Bay behind, we sail west along the sound to the Tucker Islets. After lunch, we board the Zodiacs again for a close-up view of the Magellan penguins that inhabit the tiny islands. More than 4,000 penguins use Tucker as a place to nest, give birth and nurture their chicks. Many other bird species also frequent the area including King and Rock cormorants, oystercatchers, Chilean skuas, kelp geese, dolphin gulls, eagles and even the occasional Andean condor. In September and April -- when the penguins live elsewhere - this excursion is replaced by a short walk to a glacier at nearby Brookes Bay.

Day 6: Pia Glacier – Glacier Alley

Overnight we sail around the western end of Tierra del Fuego via the very narrow Gabriel Channel, Magdalena Channel and Cockburn Channel. After rounding the remote Brecknock Peninsula, *Stella Australis* tacks eastward and enters the Beagle Channel Again. By morning we are entering Pia Fjord and boarding the Zodiacs for a shore excursion to Pia Glacier. After disembarking we take a short hike to gain a panoramic view of the spectacular glacier, which extends from the mountaintops down to the sea or a longer much more difficult walk up a lateral moraine of the old Pia Glacier.

No one knows for certain how the hulking mass of snow and ice got its feminine moniker, but one theory says it was named after Princess Maria Pia of Savoy (1847-1911), daughter of the Italian king. Back on-board *Stella Australis*, we continue east along the Beagle Channel through an area called Glacier Alley. Living up to its name, the passage features a number of impressive tidewater glaciers flowing down from the Darwin Mountains and Darwin Ice Sheet on the north shore. Most of them named after European countries -- Holland, Italy, Germany, Spain and France.

Day 7: Wulaia Bay – Cape Horn

By early morning, *Stella Australis* is once again cruising across Nassau Bay to Cape Horn. Our itinerary day repeats the shore landings and other activities from Day 2. However, second landings at some of the more iconic spots along the route can sometimes be more rewarding than the first time around and give you more time to explore each place in depth. At Wulaia bay, explore the small museum in much more depth, strike out on a longer walk than last time or birdwatch along the shore. Before leaving Wulaia Bay, drop something into the wooden mail barrel inside the museum – letters or postcards meant to be hand delivered by future travellers – an ancient mariner tradition revived by *Australis*. At Cape Horn you have a second chance to visit the Stella Maris Chapel, chat with the lighthouse keeper and his family, or photograph the unusual sub-polar flora that covers the heights. This second approach also increases your chances of landing on Cape Horn Island.

Day 8: Ushuaia

After a final night aboard *Stella Australis*, we sail back into Argentine waters and dock in Ushuaia. Acknowledged as the southernmost city in the world, Ushuaia (Argentina) was founded in 1884 and was one of the original points of contact between the indigenous Yámana and European cultures. Its name derives from the Yámana word for 'penetrating bay' and it's surrounded by the southernmost Andes peaks. With around 65,000 inhabitants, Ushuaia is now the second largest city in Tierra del Fuego (after Rio Grande). Disembarkation is scheduled at 8 AM, providing a perfect opportunity to enjoy the city and its spectacular scenery.

Important: The itinerary on the seven-night Ushuaia-Punta Arenas-Ushuaia cruise repeats excursions on days two and seven (landing on Cape Horn and Wulaia Bay).

NOTE: The excursions described in this itinerary can normally be carried out. Notwithstanding the above, Transportes Marítimos Terra Australis S.A., Transportes Marítimos Via Australis S.A., and Transportes Marítimos Geo Australis S.A reserve the right to reschedule, shorten, or alter all or part of the itineraries and/or excursions without prior notice, in order to safeguard the wellbeing and safety of passengers, preserve the environment, or due to any extraordinary circumstances, acts of God or force majeure. For the same reasons, the hours of departure or arrival of the vessels may be subject to change. There is no guarantee of wildlife sighting because the precise location of these animals cannot be confirmed.
